

The **Park ranger** is the professional figure who symbolizes the natural parks. His duties can be varied:

- It **carries out surveillance** and judicial police activities, to protect the naturalistic assets of the protected area, following the local and national environmental laws and the regulations of the Park Authority.
- It collaborate in the **recovery of injured wildlife** and its release after the treatment
- It collaborate in studies and **research** activities or in the **conservation** projects within the park area.
- It carries out **environmental education** and awareness-raising activities on naturalist issues promoted by the Park both with schools and general public.

During the project we met park rangers of the [Sesia Valley and Fondotoce protected areas](#).

GEOclimHOME Pro Geoheritage and climate change for highlighting the professional perspective
