

The **ski instructor** is a professional who accompanies and / or teaches people the **practice of skiing** in the different disciplines, both in the context of ski areas equipped and served by ski lifts and off-piste skiing routes; anyway it must carry out activities that do not require the use of mountaineering techniques and equipment, such as ropes, ice axes and crampons.

The ski instructor is also a **tour operator** who can bring the skier closer to the **mountain environment**, while respecting its natural and moral values and culture, collaborating with local authorities and local tourist organizations in the **promotion and protection** of the environment.

During the project met an instructor that works on the Monte Rosa Ski resorts, in the [Sesia Val Grande Geopark](#) area and surroundings; we discuss about the impact of climate change we together discuss about the impact of [climate change](#) on the on the ski resorts and their workers.

WHERE WE MET THEM

- TOURISM
- EDUCATION
- LOCAL BUSINESS

- Geopark boundaries
- Val Grande National Park
- Fondo Toce Natural Reserve
- Alta Valsesia and Strona Valley Regional Park
- Monte Fenera Regional Park
- Zegna Oasis
- ▲ Sacred Mounts
- Sesia Supervolcano
- Insubric Line
- Main rivers
- ▲ Main mountains

GEOclimHOME Pro Geoheritage and climate change for highlighting the professional perspective
